

MERCORIP MERCURIO

New Conveyor Belt

The New Conveyor Belt **Mercorip** Mercurio is a solution that brings a new cover with better resistance to rupture and impacts and excellent abrasion resistance, being the best answer for extreme applications.

The New Conveyor Belt **Mercorip** Mercurio was specially developed to enhance the belt's life cycle in applications with high impact conditions, reducing the cost per conveyed ton by minimizing unscheduled downtimes, thus increasing the equipment's uptime.

Its exclusive formulation grants **Mercorip** the highest efficiency in severe situations, as well as the best abrasion resistance for these types of operation-120mm³.

In order to maximize its performance, the Mercorip Belt can be combined with Mercurio accessories:

- Aramid Carcass - Brazilian manufacturing;
- Textile Carcass - NN (Nylon/Nylon) and PN (Polyester/Nylon);
- Protection System Accessories - Rip Proof, Rip Stop and Dampers.

The exclusive characteristics' combination of tear resistance, rupture and impact resistance, and abrasion resistance make th New Conveyor Belt **Mercorip** Mercurio the ultimate solution in the market for extreme applications.

- High tear and impact resistance;
- High abrasion resistance;
- High rupture resistance;
- High resilience.

For proper conveyor belt specification and its cover, contact our highly specialized Application Engineering and Technical Assistance teams.
